

CH Sharif & Saeed Hospital

Panel Patient Complete Flow, Forms & Billing Architecture

Super Admin / Admin setup -> Panel Patient Registration -> Front Desk Treatment -> Admission
-> Billing -> Panel Receivable

Version v7.4	Scope Corporate Company, Insurance, Corporate/Institutional Panel
Permanent Patient Master Panel patients only	Money Collection Front Desk / Billing for patient share

Core Principle

A Panel Patient is a permanent reusable hospital patient record. The same hospital Panel Patient ID/MRN is reused for OPD, Observation, Emergency, Appointments and Admission. The panel company/member identity is linked separately.

This document defines the complete functional flow and the exact forms/fields required for Super Admin, Admin, Front Desk and Admission Portal. It uses three example panel categories: XYZ Company (Employer/Corporate), ABC Insurance (Insurance), and Corporate Panel A (Institutional/Contract Panel). All names are examples; production data must be database-driven.

1

PANEL ARCHITECTURE - WHAT EXISTS IN THE SYSTEM

One company master, reusable panel patients, service/department coverage rules

The system should not create three separate software modules for XYZ Company, ABC Insurance and Corporate Panel A. All three use one **Panel Company Master**; the selected **Panel Category** controls the rules, member fields and billing behavior.

Example	Panel Category	Typical Identity	Typical Billing
XYZ Company	Employer / Corporate Company	Employee/Member ID + Hospital Panel Patient ID	Employer pays covered share; patient pays co-pay/uncovered share
ABC Insurance	Insurance	Policy/Member No. + Hospital Panel Patient ID	Insurance coverage, limits, exclusions, approvals; patient share remains separate
Corporate Panel A	Institutional / Contract Panel	Member/Beneficiary No. + Hospital Panel Patient ID	Contract tariff/package/coverage; institution pays panel receivable

Identity Rule

Hospital Panel Patient ID/MRN and external Member/Policy/Employee ID are different fields. The hospital ID is permanent inside CHSS; the external ID belongs to the panel organization.

Patient share collected by Front Desk
Panel share stays receivable until organization pays

2

SUPER ADMIN / ADMIN - ADD PANEL COMPANY

Create XYZ Company, ABC Insurance or Corporate Panel A

Panel Company Form - Common Fields

Field	Required	Purpose / Rule
Panel Code	Yes	Unique database-backed code; generated or entered according to hospital policy.
Panel Name	Yes	e.g. XYZ Company / ABC Insurance / Corporate Panel A.
Panel Category	Yes	Employer/Corporate, Insurance, Institutional/Contract.
Legal / Billing Name	Optional	Name used on claims/statements if different.
Contact Person	Optional	Primary panel coordinator.
Phone / Email	Optional	Panel communication details.
Billing Address	Optional	Statement/claim billing address.
Member Validation Required	Yes	Whether member/policy identity must be validated before billing.
Authorization Required	Configurable	Whether treatment/admission requires approval/guarantee/reference.
Billing Terms	Optional	e.g. monthly statement / agreed cycle; no hardcoded terms.
Credit Limit	Optional	Panel credit control where hospital uses one.
Status	Yes	Active / Inactive. Inactive panels cannot be used for new cases.
Notes	Optional	Operational notes only.

3

CATEGORY-SPECIFIC PANEL SETTINGS

Fields shown according to selected Panel Category

A. XYZ Company - Employer / Corporate Company

Field	Required	Purpose / Rule
Employee / Member ID Label	Optional	Example label used by the company; actual member value is stored on patient record.
Employee Relationship Required	Configurable	Employee / spouse / child / dependent if the company requires it.
Department/Grade/Designation	Optional	May be stored for company entitlement rules if required.
Guarantee Letter Required	Configurable	Whether admission/specific services require company guarantee.
Coverage / Co-pay Rules	Yes for covered billing	Configured separately by department/service.

B. ABC Insurance - Insurance Panel

Field	Required	Purpose / Rule
Policy / Member Number Required	Configurable	Member/policy number captured on patient registration.
Policy Effective / Expiry Required	Configurable	Allows validity check for new treatment.
Pre-Authorization Required	Configurable	Can be required for admission or selected services.
Authorization Limit / Reference	Optional per case	Stored on encounter/admission, not as a permanent charge.
Coverage / Exclusion / Co-pay Rules	Yes for covered billing	Configured by service/department/contract.

C. Corporate Panel A - Institutional / Contract Panel

Field	Required	Purpose / Rule
Beneficiary / Member Number	Configurable	External institutional member reference.
Package / Contract Reference	Optional	Contract identifier or plan name.
Referral / Authorization Requirement	Configurable	Required where contract demands it.
Tariff / Package Rules	Yes for special pricing	Specific contracted service/department rates.
Patient Share Rules	Configurable	Fixed co-pay, percentage or not covered.

Do not hardcode

Company names, tariff rates, departments, services, co-pay values, coverage percentages and authorization rules must all come from database configuration.

4

PANEL COVERAGE & TARIFF RULES

Admin configures what the panel actually pays

Coverage precedence should remain: **Service rule -> Department rule -> Global panel rule -> NOT_COVERED**. If no active applicable rule exists, the patient is responsible for the full eligible amount and panel receivable is zero.

Field	Required	Purpose / Rule
Panel Company	Yes	The panel whose contract is being configured.
Rule Scope	Yes	Service / Department / Global.
Department	Conditional	Required for a Department rule; dynamic active departments only.
Service	Conditional	Required for a Service rule; dynamic Services & Rates only.
Coverage Type	Yes	Percentage / Fixed Patient Share / Full Coverage / Not Covered.
Coverage Value	Conditional	Percentage or fixed amount where applicable.
Contract Tariff / Rate	Optional	If contracted rate differs from standard hospital rate.
Effective From	Yes	Start date.
Effective To	Optional	End date.
Authorization Required	Optional	Rule-specific authorization requirement.
Status	Yes	Active / Inactive.
Notes	Optional	Contract notes.

Situation	Patient Share	Panel Receivable
Full Coverage	0	Eligible Net
Percentage Coverage	Eligible Net minus Panel Share	Configured percentage of eligible net
Fixed Patient Share	Configured patient amount	Eligible Net minus patient amount
NOT_COVERED	Full Eligible Net	0
No matching active rule	Full Eligible Net	0

5

PANEL PATIENT REGISTRATION - WHO CAN ADD?

Super Admin, Admin and authorized Front Desk

Role	Can Register Panel Patient?	Can Create/Edit Panel Company?	Can Change Coverage/Tariff?
Super Admin	Yes	Yes	Yes
Admin	Yes	Yes	Yes
Front Desk / Billing	Yes - under an existing active panel	No	No
Admission Portal	No	No	No

Front Desk Registration Boundary

Front Desk may create a new permanent Panel Patient only under an already configured active Panel Company. Front Desk must not create a new Panel Company, alter contract tariffs, or change coverage rules.

Duplicate prevention before save: search by Hospital Panel Patient ID/MRN, external Member/Policy/Employee ID, CNIC/B-Form, phone and name + DOB as appropriate. If a likely match exists, Front Desk/Admin should link/use the existing patient instead of creating a duplicate.

6

PANEL PATIENT REGISTRATION FORM

Fields for Super Admin / Admin / Front Desk

Field	Required	Purpose / Rule
Panel Company	Yes	Select an active configured panel.
Panel Category	Auto	Derived from selected panel; not manually retyped.
External Member / Employee / Policy ID	According to panel rule	Company-issued identity.
Hospital Panel Patient ID / MRN	Auto	System-generated permanent reusable hospital identity.
Full Name	Yes	Patient legal/display name.
Father / Husband / Guardian Name	Optional/Configured	Patient identity/support field.
CNIC / B-Form	Optional/Configured	Identity validation.
Gender	Yes	Patient demographic.
Date of Birth / Age	Yes	DOB preferred; age derivable where possible.
Mobile Number	Yes	Primary contact.
Address	Optional	Patient address.
Principal / Employee Name	Conditional	For dependents where required.
Relationship to Principal	Conditional	Self / spouse / child / dependent etc.
Membership Effective From	Optional/Configured	Membership validity.
Membership Expiry	Optional/Configured	Used to prevent expired membership usage.
Policy / Plan / Package	Conditional	Insurance or institutional plan where required.
Default Authorization / Reference	Optional	Only if panel provides a persistent reference; case-specific approval is stored on each visit/admission.
Status	Yes	Active / Inactive / Expired as supported.
Notes	Optional	Non-financial registration notes.

What is permanent?

Patient identity and panel membership link are permanent/reusable. Visit-specific authorizations, service orders, admissions, invoices, receipts and claims remain transaction records, not permanent patient-master fields.

7

PANEL PATIENT IDENTITY FLOW

How the patient is found every time

For every new visit the system validates that the panel and membership are still active. A patient record can remain historically visible even if membership becomes inactive/expired, but new covered transactions must follow the current contract and membership status.

8

FRONT DESK - COMMON PANEL PATIENT FLOW

Appointments, OPD, Observation and Emergency

Create encounter & financial record
Same permanent Panel Patient linked

9

FRONT DESK PANEL ENCOUNTER FORM FIELDS

Fields used after the patient is selected

Field	Required	Purpose / Rule
Panel Patient	Yes	Selected permanent patient record.
Panel Company	Auto	Loaded from membership.
External Member / Policy ID	Auto/View	Loaded from patient record.
Encounter Type	Yes	Appointment / OPD / Observation / Emergency as applicable.
Doctor	Optional where configured	Only eligible active doctors for the flow.
Service	Yes for billable encounter	Dynamic Services & Rates.
Standard / Contract Rate	Auto	Resolved from service/panel tariff rules.
Authorization / Referral No.	Conditional	Required when contract or service rule requires it.
Authorization Limit / Validity	Conditional	Insurance/corporate authorization controls.
Patient Share	Auto	Calculated.
Panel Receivable	Auto	Calculated.
Payment Amount	Conditional	Patient may pay full/partial patient share according to billing rules.
Payment Method	Conditional	Cash/Card/Bank/Online as supported.
Remarks	Optional	Operational note.

No coverage rule

If no applicable active panel rule exists, the service is NOT_COVERED: patient share = full eligible amount; panel receivable = 0.

XYZ Company - Employer / Corporate

Search employee/dependent -> validate company membership -> select service -> company contract rule calculates patient co-pay and company receivable -> Front Desk collects only patient share. If company requires guarantee for a high-value service/admission, capture the guarantee/reference before covered billing.

ABC Insurance - Insurance

Search policy/member -> validate policy dates/plan -> obtain pre-authorization where required -> apply coverage/exclusion/co-pay rules -> collect patient share -> insurance portion remains receivable. Authorization reference is stored on the case/encounter.

Corporate Panel A - Institutional / Contract Panel

Search beneficiary -> validate contract/member -> apply contracted tariff/package -> calculate patient share and institutional receivable -> collect patient share -> institution portion remains receivable until realized.

Example	Gross	Adjustment/Tariff	Patient Share	Panel Receivable
XYZ Company OPD	2,000	Contract according to rule	400	1,600
ABC Insurance Test	10,000	Coverage according to policy	2,000	8,000
Corporate Panel A Procedure	20,000	Contract net according to tariff	5,000	15,000

Amounts above are workflow examples only, not system defaults.

11

PANEL PATIENT ADMISSION - FRONT DESK

Admission begins at Front Desk / Billing

12

PANEL ADMISSION INTAKE FORM FIELDS

Front Desk / Billing

Field	Required	Purpose / Rule
Panel Patient	Yes	Search existing or Quick Register under active panel.
Panel Company	Auto	Loaded from patient membership.
Member / Policy / Employee ID	Auto/View	External panel identity.
Authorization / Guarantee Required	Auto/Rule	Derived from panel/contract rules.
Authorization / Guarantee No.	Conditional	Required if the rule requires approval.
Authorization Limit / Valid Until	Optional/Conditional	Case-specific insurance/company control.
Admission Reason	Yes	Administrative/provisional admission reason.
Provisional Diagnosis	Optional	If available at Front Desk.
Admitting / Consultant Doctor	Optional	May be Not Assigned Yet.
Ward / Room / Bed	According to configured hierarchy	Initial accommodation selection; room can be optional.
Estimated Amount (PKR)	Optional	Manual informational estimate only; does not affect ledger/payable.
Advance Amount	Optional	Patient-share advance; real payment/credit.
Payment Method / Reference	If advance collected	Receipt accounting fields.
Outsourced Services	Default Hospital Managed	Hospital Managed or Self Managed/External.
Pharmacy Fulfillment	Default Hospital Managed	Hospital Managed or Self Managed/External.
Attendant Name / Relationship / Phone	Recommended	Admission contact.
Notes	Optional	Admission operational notes.

13

WHAT THE PANEL PATIENT / GUARDIAN RECEIVES

Start to finish

Stage	Patient / Guardian Receives
Panel Registration	Panel Patient ID/MRN confirmation/card/printout if hospital chooses to issue one; membership reference remains recorded.
OPD / OBS / ER	Payment receipt for patient share; encounter/visit slip where applicable.
Admission Start	Admission Slip / Acknowledgment; Ward/Room/Bed information; patient-share Advance Receipt if paid; panel authorization/reference shown where appropriate.
During Admission	Every additional patient payment receipt; Running / Interim Statement when requested.
Clinical Discharge	Doctor Discharge Summary, medicines/instructions/follow-up.
Final Billing	Final consolidated patient statement/bill, final payment receipt, financial clearance/gate pass if hospital uses one.

Internal case file

The internal digital/clinical admission file stays with the hospital system. The patient mainly receives acknowledgment, receipts, statements and discharge documents.

14

ADMISSION PORTAL - PANEL PATIENT MANAGEMENT

No new patient registration and no patient cash collection

Status -> Clinically Discharged - Billing Pending
Front Desk completes financial closure

15	OUTSOURCED & PHARMACY FULFILLMENT FOR PANEL PATIENTS			Hospital Managed vs Self Managed / External
Mode	Clinical/Operational Record	Patient Ledger	Department Payable/Settlement	
Hospital Managed	Request/service remains in hospital workflow	Charge posted according to service + panel coverage rules	Applicable outsourced/standalone department realized collection may become settlement eligible	
Self Managed / External	Request/need/history still recorded	No internal charge for that self-arranged line	No hospital outsourced payable for that line	

Default behavior: Outsourced Services = Hospital Managed and Pharmacy Fulfillment = Hospital Managed unless the user explicitly changes the choice. The choice must persist through the admission workflow.

Where a department/service does not allow external fulfillment, the system should not offer Self Managed/External and should remain Hospital Managed.

The admitted Panel Patient should not receive a brand-new patient-facing invoice every time a Lab, Pharmacy, procedure or accommodation charge is posted. All eligible activity accumulates in one Admission Patient Record / Running Ledger. Department ownership remains preserved underneath.

Ledger Entry Examples	Effect
Patient-share admission advance	Credit/payment; not a service charge.
Ward one-time configured charge	Charge once according to current ward billing rule.
Room daily charge	Daily accommodation charge if configured.
Hospital service/procedure	Charge with department/service ownership.
Lab / Neurology / other outsourced service	Charge only when Hospital Managed; panel rules apply.
Pharmacy charge	Charge only when Hospital Managed and integrated/dispensed.
Partial payment by guardian	Credit/receipt; reduces patient-share outstanding only.
Panel receivable	Separate payer balance; not patient cash.

Estimated Amount is not billing

The Front Desk Estimated Amount is informational and may appear on the Admission Slip as "Estimated Amount - Subject to Final Billing". It must not create a ledger charge or alter the final payable.

17

RUNNING / INTERIM STATEMENT - PANEL ADMISSION

Available any time without closing the admission

Field	Required	Purpose / Rule
Patient / Admission Identity	Display	Hospital Panel Patient ID, external member ID, Admission No.
Panel Company	Display	Payer organization.
Gross Charges	Calculated	All eligible internal hospital-managed charges.
Panel Contract Adjustment / Benefit	Calculated	Contract/tariff reduction where applicable.
Net Eligible	Calculated	Post-contract eligible amount.
Patient Share	Calculated	Patient-payable portion.
Panel Receivable	Calculated	Organization-payable portion.
Patient Payments / Advance	Calculated	Real receipts allocated/credited.
Panel Paid / Realized	Calculated	Only organization payments actually received.
Patient Outstanding	Calculated	Patient share minus patient payments.
Panel Outstanding	Calculated	Panel receivable minus panel realized payments.

Required label

INTERIM / RUNNING STATEMENT - NOT FINAL INVOICE

18

PANEL PATIENT DISCHARGE & FINANCIAL CLEARANCE

Clinical discharge and financial clearance remain separate

19

PANEL RECEIVABLE & COMPANY PAYMENT

What happens after the patient leaves

**Critical settlement rule**

Unpaid Panel Receivable is not realized cash and must not become an outsourced department settlement payable until the panel company actually pays.

Example 1 - XYZ Company employee admitted

Admin creates XYZ Company -> configures corporate coverage -> Admin/Front Desk registers employee -> Front Desk searches employee -> validates company membership -> creates admission -> records guarantee if required -> collects patient-share advance -> sends case to Admission Portal -> inpatient services accumulate in Admission Ledger -> patient pays co-pay/partial amounts at Front Desk -> doctor clinically discharges -> Front Desk clears patient share -> XYZ Company amount remains receivable -> later corporate payment is allocated.

Example 2 - ABC Insurance member comes to Emergency

Admin creates ABC Insurance -> configures plan coverage and authorization rules -> member registered once -> Front Desk searches policy/member -> Emergency service selected -> insurance coverage calculated -> patient co-pay collected -> if admission is required, same permanent patient identity is used -> pre-authorization captured where required -> admission and running ledger continue -> insurer share remains receivable until paid.

Example 3 - Corporate Panel A patient comes for OPD then later Admission

Admin creates Corporate Panel A -> contract tariff configured -> beneficiary registered -> OPD visit reuses same patient ID -> contracted rate splits patient/panel share -> later patient returns for admission -> Front Desk finds same patient, does not create a second master -> admission authorization/advance/accommodation are captured -> final patient share is settled at Front Desk -> corporate receivable is billed later.

21	REQUIRED SCREENS / FORMS		Implementation checklist
Portal	Screen / Form	Purpose	
Super Admin / Admin	Panel Companies	Create/edit/deactivate panel organizations.	
Super Admin / Admin	Panel Coverage / Tariff Rules	Configure service/department/global coverage.	
Super Admin / Admin	Panel Patient Registry	Register/manage permanent panel patients.	
Front Desk / Billing	Panel Patient Search / Quick Register	Find existing or register under existing active panel.	
Front Desk / Billing	Appointment / OPD / OBS / ER	Use same permanent patient and calculate payer split.	
Front Desk / Billing	Admission Intake	Create panel admission, authorization, advance, estimate, accommodation, fulfillment.	
Front Desk / Billing	Admission Patient Records	Running ledger, payments, statements and final billing.	
Admission Portal	Incoming / Active Admissions	Receive and manage stay; no patient cash collection.	
Admission Portal	Department / Pharmacy Requests	Post hospital-managed services; record self-managed external items without internal charge.	
Admission Portal	Doctor Authorized Discharge	Clinical discharge only.	
Billing/Admin	Panel Billing / Receivables	Claims/statements, organization receipts and allocations.	

- **One Panel Company Master:** XYZ Company, ABC Insurance and Corporate Panel A are category-driven records, not separate hardcoded modules.
- **Permanent Panel Patient:** one hospital Panel Patient ID/MRN reused for every future encounter/admission.
- **Front Desk may register Panel Patients:** only under an already configured active panel; cannot modify contract rules.
- **Coverage is dynamic:** service -> department -> global -> NOT_COVERED.
- **No rule means no coverage:** patient full eligible amount, panel receivable zero.
- **Patient share and Panel Receivable are separate payer balances.**
- **Admission starts at Front Desk:** admission identity, initial accommodation, estimate, advance, fulfillment choices and handoff.
- **Estimated Amount is informational only:** never a ledger charge or final payable calculation input.
- **Admission Portal does not collect patient cash:** all patient payments stay with Front Desk/Billing.
- **Hospital Managed fulfillment:** internal charge + panel rules + downstream settlement where applicable.
- **Self Managed / External:** record/history only, no internal charge/payable for that service line.
- **One Admission Ledger:** inpatient charges and payments accumulate in the same Admission Patient Record.
- **Doctor clinical discharge is separate from financial clearance.**
- **Unpaid Panel Receivable is not realized collection:** no outsourced settlement until company payment is actually received.
- **No hardcoding:** companies, departments, services, rates, coverage, authorizations and statuses come from database configuration.

Implementation status label

Use this document as the functional specification for Panel Company setup, Panel Patient registration, Front Desk panel flows, Panel Admission and Panel Receivable behavior.
