

CH SHARIF AND SAEED HOSPITAL

Super Admin Portal

Complete Functional and Workflow Blueprint

Hospital-wide governance, workforce, finance, settlements and reporting.

Prepared by iSysware Software Solutions | Final Source of Truth v6.3

Portal purpose

Super Admin is the highest protected management portal. It has full normal hospital-management functionality and protected-account safeguards. It monitors every operational portal without taking over their transaction ownership.

Navigation / module groups

Group	Modules

Staff 360° Profile

- Open any staff member and view Overview, Employment/Shift, Attendance, Salary Profile, Salary History, Commission Profile/History, linked Portal Access and notes/documents.
- Run individual Attendance Report, Salary Report, Doctor Commission Report and employment/shift history.
- Attendance corrections require reason and preserve original/corrected values.
- Future Staff Portal can link to this same profile using staffId; no duplicate employee record.

Salary and Commission governance

Staff Profile -> Staff-specific Salary Rules -> Approved Attendance -> Generate Salary -> Approve -> **Pay Full/Partial/Later**

Completed Doctor Services -> Staff-specific Commission Rules -> Generate Commission -> Approve -> **Pay Full/Partial/Later**

Salary and Commission are completely separate payables. Commission is not automatically added into Salary.

Petty cash and settlement control

- Issue petty cash/advance to Inventory users and other authorized cash holders according to hospital policy.
- Review Front Desk/Billing, Inventory and management-side settlements.
- See each user's expected cash, physical cash, variance, amount submitted and remaining cash.
- Pharmacy settlement is owned by standalone Pharmacy management; HMS may receive summary/integration status if required.

Safeguards

- Cannot disable/delete the currently logged-in Super Admin or remove the last active Super Admin.
- All actions show actual user identity.
- Posted financial, stock, payroll and commission history uses reversal/adjustment, not silent delete.
