

CH SHARIF AND SAEED HOSPITAL

Admin Portal

Complete Functional and Workflow Blueprint

Same normal hospital-management scope as Super Admin, with protected Super Admin safeguards.

Prepared by iSysware Software Solutions | Final Source of Truth v6.3

Functional parity with Super Admin

Admin receives the same normal operational and management modules: hospital setup, staff, shifts, attendance, salary, doctor commission, finance, reports, inventory oversight, appointments/admissions overview and settlements. The difference is only protected Super Admin account control.

Protected-account restrictions

- Admin cannot create/generate a Super Admin account.
- Admin cannot delete, deactivate, suspend, demote or change role/credentials/access of a Super Admin.
- Admin cannot reset a protected Super Admin password.
- Admin actions remain attributed to the actual logged-in Admin.

Staff, Attendance and Payroll

- Individual Staff Profile with Attendance, Salary, Commission and employment history reports.
- Admin can correct attendance with mandatory reason and preserved audit trail.
- Salary generation/payment and Doctor Commission generation/payment are independent modules.
- Staff-specific compensation rules are configured on Staff Add/Edit; global setup stores only reusable rule types/templates.

Financial and settlement role

- Review cashier/inventory settlement submissions.
- Monitor user-wise Balance Sheets and consolidated cash position.
- Approve/return/partially settle based on policy.
- Track collections, refunds, expenses and outstanding by user/date/method.

Operational monitoring

Area	Admin visibility
Front Desk/Billing	Appointments, OPD/OBS/ER billing, collections and settlement
Admission	Planned/active admissions, service charges, payment requests, medicine mode, clearances
Inventory	Purchases, stock ledger, supplier ledger, issues/transfers/adjustments, cash settlement
Pharmacy bridge	Medicine request and Pharmacy clearance status only; Pharmacy system owns medicines and Pharmacy billing
