

CH SHARIF AND SAEED HOSPITAL

Admission Portal

Planned Admission, Active Stay, Services, Pharmacy Coordination and Discharge

Non-cash operational portal connected to Billing and standalone Pharmacy.

Prepared by iSysware Software Solutions | Final Source of Truth v6.3

Admission lifecycle

Planned/Direct Admission -> Department + Doctor -> Ward / Room / Bed -> Active Stay -> Services + Requests -> Clearances -> **Discharge**

Planned Admission / Booking

- Patient/temporary identity, doctor, department, expected date/time, ward/room preference, notes and estimated Hospital amount.
- Advance request can be created, but Billing collects payment and sends payment status back.
- Tentative bed reservation may be used; Occupied status begins only after actual admission.

Active stay and running Hospital bill

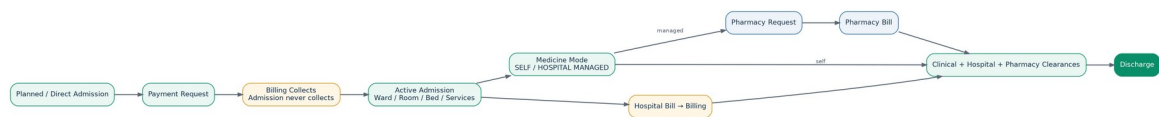

- Room/bed charges, procedures, tests and other hospital services are added to the running Hospital bill.
- Patient may pay in multiple partial installments, but every Hospital payment is received by Front Desk/Billing.
- Admission can view payment receipts/status; it does not receive cash.

Medication fulfillment mode

Mode	Behavior
SELF	Patient/attendant arranges medicines; no Hospital-managed Pharmacy request/invoice is created for those medicines.
HOSPITAL MANAGED	Admission sends request to standalone Pharmacy; Pharmacy accepts/partially fulfills/rejects, dispenses, bills and sends clearance status.

- Mode can change during admission.
- Change stores previous mode, new mode, reason, Changed By and Date/Time.
- Previously dispensed medicine is not deleted by switching mode; returns/refunds follow Pharmacy workflow.

Two-bill discharge architecture

Hospital and Pharmacy bills remain separate; discharge uses clearance states.

Financial stream	Owner / clearance
Hospital Bill	Front Desk/Billing -> Hospital Billing Clearance
Pharmacy Bill	Standalone Pharmacy -> Pharmacy Clearance

Final discharge = Clinical Ready + Hospital Billing Clearance + Pharmacy Clearance when Pharmacy-managed medicines were used.

Reports

- Planned Admissions, active admissions, bed occupancy and transfers.
- Running Hospital charges and Billing payment-request status.
- Medication mode changes and Pharmacy request status.
- Discharge readiness and clearance delays.
