

CH SHARIF AND SAEED HOSPITAL

Inventory Management Portal

Procurement, Stock Ledger, Supplier Ledger, Department Issues, Cash Control and Settlement

General hospital inventory only; medicine stock remains in Pharmacy.

Prepared by iSysware Software Solutions | Final Source of Truth v6.3

Inventory scope

Inventory owns non-medicine hospital supplies and operational stock. It must be a full controlled stock module, not just an expense-entry screen.

Masters

- Item/Product Master: code, name, category, unit, reorder level, active status, optional location.
- Supplier Master: name, contact, phone, address, terms/status.
- Stock locations/stores and receiving/issuing departments.

Procurement and receipt flow

Requirement / Low Stock -> Purchase Request -> Approval / Funding -> Supplier Purchase -> Goods Receipt -> Stock Ledger IN -> **Supplier Ledger Update**

- Cash purchase paid from Inventory user petty cash reduces user cash immediately.
- Direct management/online payment does not enter the Inventory user's physical cash.
- Credit purchase can create Supplier Outstanding if enabled.

Stock Ledger

Movement	Stock effect
Purchase/Receipt	IN
Department Return	IN
Transfer In	IN
Positive Adjustment	IN
Department Issue	OUT
Supplier Return	OUT
Transfer Out	OUT
Damage/Loss/Negative Adjustment	OUT

- Every ledger row keeps date/time, item, quantity, source/destination, reference, user and running balance.
- Negative stock should be blocked unless the client explicitly enables a controlled exception.

Supplier Ledger

- Opening outstanding if migration requires it.
- Credit purchases increase supplier outstanding.
- Supplier payments reduce outstanding.
- Purchase returns/approved credits reduce outstanding.
- Cash purchase paid in full may post purchase and payment together with zero new outstanding.

Department issue and return

Store Stock -> Issue Request/Direct Authorized Issue -> Department/Ward -> Consumption/Use -> **Unused Return if any**

Stock issue is a stock movement, not a supplier transaction. Every issue/return identifies department and actual issuing/receiving user.

Inventory user Balance Sheet and Settlement

- Admin/Super Admin may issue petty cash/advance to an Inventory user.
- Cash purchases and approved cash expenses reduce that user's expected physical cash.
- Each Inventory user submits their own daily/shift/custom Account Settlement.
- Expected vs physical cash variance is recorded and reviewed.

Reports

- Stock Ledger, Stock Balance, low/reorder stock, Purchase/Receipt, Supplier Ledger/Outstanding, Supplier Returns, Department Issue/Return, Transfers, Adjustments/Damage, user cash Balance Sheet and Account Settlement.
