

CH SHARIF AND SAEED HOSPITAL

Standalone Pharmacy System

Master Architecture and HMS Integration

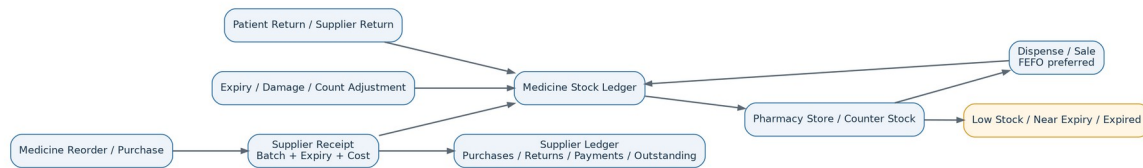

Separate medicine inventory, dispensing, billing and cash-control system.

Prepared by iSysware Software Solutions | Final Source of Truth v6.3

System boundary

Pharmacy portal	Responsibility
Pharmacy Super Admin	Full Pharmacy governance, configuration, users, financial oversight and reports
Pharmacy Manager	Medicine inventory, suppliers, purchases, batches/expiry, stock ledger, supplier ledger, requests and operational control
Sales / Dispensing Staff	Retail/HMS dispensing, Pharmacy invoices/payments/returns within permission, own cash Balance Sheet/Settlement

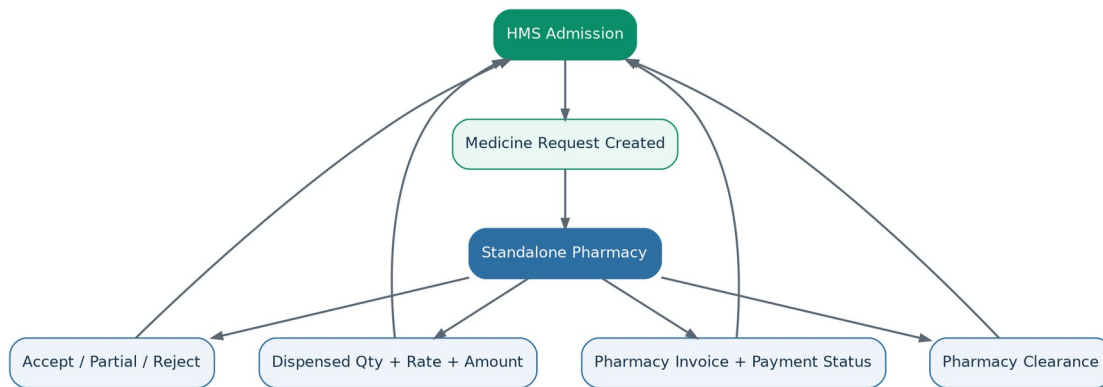

Medicine inventory architecture

Pharmacy owns medicine stock, batch/expiry and supplier ledgers.

- Medicine Master with batch/expiry requirement, unit, sale/purchase rates as configured.
- Supplier purchase/receipt posts Medicine Stock Ledger IN and Supplier Ledger.
- Store/counter transfers are internal stock movements.
- Dispensing posts stock OUT from an eligible batch; FEFO is preferred for expiry-managed medicines.
- Patient return, supplier return, expiry/damage and count adjustment create explicit stock movements.

HMS Admission integration

HMS requests medicine; Pharmacy owns dispense, Pharmacy invoice and Pharmacy clearance.

- HMS sends request only for HOSPITAL MANAGED mode.
- Pharmacy can Accept / Partially Fulfill / Reject.
- Pharmacy returns actual dispensed quantity, rate, amount, invoice/payment status and clearance.
- Pharmacy bill is separate from Hospital bill.

Financial/cash architecture

- Each Pharmacy cash-handling Sales/Dispensing user maintains their own Balance Sheet and submits their own settlement.
- Pharmacy Manager/Super Admin reviews Pharmacy-side settlements.
- Online/card/bank amounts are reported separately from physical cash.
