

CH SHARIF AND SAEED HOSPITAL

Pharmacy Manager Portal

Medicine Inventory, Suppliers, Batches, Stock Ledger, HMS Requests and Staff Control

ERP-style medicine inventory management adapted for hospital Pharmacy operations.

Prepared by iSysware Software Solutions | Final Source of Truth v6.3

Manager inventory modules

Module	Manager workflow
Medicine Master	Create/maintain medicine, unit, category, batch/expiry settings and status
Suppliers	Supplier profiles and terms/status
Purchases / Receipts	Supplier -> items -> batch -> expiry -> qty -> cost -> receipt -> Stock Ledger IN
Medicine Stock Ledger	Every IN/OUT/transfer/return/adjustment by item, batch and location
Supplier Ledger	Purchases, returns, payments/credits and outstanding
Batch/Expiry	Batch balance, expiry dates, near-expiry/expired handling
Locations/Transfers	Store -> counter / counter -> store / location-to-location
Returns	Patient return and supplier return with stock/financial effect
Adjustments	Expiry, damage, breakage, count variance with reason and actor
Alerts	Low stock, out of stock, near expiry, expired
HMS Requests	Accept/partial/reject Admission request, allocate batch, dispense, send status back

Stock control principle

- No manual silent stock editing. Corrections post Adjustment entries.
- Batch-managed medicine requires batch on receipt/dispense/return.
- FEFO should guide batch selection where expiry matters.
- Stock and supplier ledgers preserve references and actual users.

Cash and staff settlement oversight

- Manager can review Sales/Dispensing Staff cash Balance Sheets and submitted settlements if granted.
- Manager does not merge users into one cash drawer; every cashier's accountability remains separate.
