

CH SHARIF AND SAEED HOSPITAL

Hospital Management System - Master Blueprint v7.2

Final architecture, admission ownership, department billing, outsourced settlement, doctor finance and panel flow.

FINAL SOURCE OF TRUTH - VERSION 7.2

Admission begins at Front Desk. Department bills remain separate. Central collections are allocated department-wise. Doctor discharge re-authentication, outsourced department settlement, Panel receivables, high-cost medicine approval, doctor-sponsored discount and doctor tax rules are included.

Supersedes v7.1 for all revised admission, billing, department settlement, doctor finance and panel-flow rules.

1. Final v7.2 System Boundary

- Main HMS portals: Super Admin, Admin, Front Desk / Billing, Admission, Inventory Management.
- Standalone Pharmacy remains a separate connected project with Pharmacy Super Admin, Pharmacy Manager and Pharmacy Sales / Dispensing Staff.
- Lab, Neurology and similar clinical service departments are configured through Department Master. If outsourced, they also link to an Outsourced Provider profile and settlement rules.
- Front Desk is the central point for admission creation and patient money collection.

2. Admission-to-Billing Source of Truth

Admission lifecycle

1	Front Desk identifies Self-Pay or Panel patient, creates admission file, records initial department/service fulfillment choices and may receive advance.
2	Admission Portal receives the case, assigns/maintains bed and adds inpatient services, procedures and department requests.
3	Every charge line is tagged to its bill-owning department and accumulates in that department sub-invoice.
4	Patient/attendant may request an interim running statement and may make partial payment at Front Desk at any time.
5	Doctor re-authenticates with clinical authorization username/password and completes discharge summary.
6	Case becomes Clinically Discharged - Billing Pending and returns to Front Desk for final financial closure.
7	Front Desk settles patient responsibility and allocates payment to Hospital, Lab, Pharmacy, Neurology and other sub-invoices.
8	Outsourced department/provider payable becomes available for later full/partial settlement by authorized Billing/Admin/Super Admin users.

3. Department Billing and Central Collection

Concept	v7.2 rule
Department sub-invoice	Each bill-owning department keeps its own gross, discounts/contract adjustments, net, paid and outstanding.
Patient collection	Front Desk/Billing collects advance, partial and final patient payments.
Allocation	Every received payment is allocated to one or more department invoices. Allocated total must equal the payment amount.
Hospital discount	Hospital-funded discount is posted only to Hospital Services invoice unless another owner-specific policy explicitly applies.
Doctor discount	Doctor-sponsored discount reduces patient due on the doctor-related service and is deducted from that doctor's commission.
Outsourced settlement	Provider payable is settled only from realized collections, not merely billed/uncollected amounts.

4. Advance, Partial Payment and Running Bill

- Admission advance is initially patient credit. It is not department revenue until allocated against an actual charge/invoice.
- During stay, patient may pay any allowed partial amount at Front Desk. Allocation screen shows each department outstanding before posting.
- Running / Interim Statement can be printed any time and clearly states that it is not the final discharge invoice.
- Interim statement shows department subtotals, department-specific discounts/contract pricing, patient share, panel share where applicable, advance, payments and current outstanding.

5. Outsourced Departments and Providers

- Super Admin/Admin creates the Department, marks billing ownership and whether the service is Internal or Outsourced.
- For Outsourced mode, management links an Outsourced Provider profile: legal/display name, contact, representative, payment terms, allowed payment methods, bank/cheque details, settlement frequency, tax/withholding configuration if used, and active status.
- Lab, Neurology and similar providers receive settlement against department/provider ledger, not directly from the patient.
- Authorized Billing/Admin/Super Admin users may Full Settle, Partial Settle or Settle Later with settlement voucher and provider acknowledgement.

6. Doctor Discharge, Commission Discount and Tax

Area	Rule
Discharge authority	Admission user starts discharge action, but clinical discharge only completes after doctor credential re-authentication and discharge summary.
Doctor credentials	Doctor Staff profile stores clinical authorization username and credential status. Password is never printed.
Doctor-sponsored discount	Explicit discount source; amount is charged against that doctor's commission payable.
Hospital-funded discount	Affects Hospital Services; commission impact follows configured commission base, but is not automatically charged as doctor-sponsored discount.
Salary tax	Configured separately on doctor/staff salary profile with method/rate/value and effective date.
Commission tax	Configured separately on doctor commission profile and deducted from commission payable after applicable doctor-sponsored discount/adjustments.

7. Panel Patient Accounting

- Panel patient is selected from permanent Panel Patient Registry and active panel membership is verified.
- Applicable tariff/coverage is resolved by department/service. Each department invoice stores Patient Share and Panel Receivable separately.
- Patient co-pay/share is collected by Front Desk. Panel receivable remains open until actual panel remittance is posted.
- Outsourced department settlement is based on realized amount: patient share collected plus panel remittance actually realized for that department.
- High-cost medicine policy may apply to Panel patients too, and can additionally require panel authorization/reference when configured.

8. Non-Negotiable Rules

- Admission is created at Front Desk / Billing, not inside the Admission Portal.
- Front Desk may collect admission advance and any later partial/final Hospital collections.
- Admission Portal receives the admission file and manages bed, stay, procedures, department requests, running charges and discharge workflow.
- Each bill-owning department has a separate sub-invoice. Front Desk remains the central patient collection point.
- Collected money is allocated to the related department invoice; settlement to outsourced departments happens later through an authorized settlement workflow.
- Hospital-funded discount affects Hospital Services only. Doctor-sponsored discount is explicitly charged against that doctor's commission.
- Only a doctor with valid clinical authorization credentials may clinically discharge an admitted patient.
- High-cost medicine requests are blocked until the configured authorization policy is satisfied.
- Panel patients keep patient-share and panel-receivable amounts separate at department-invoice level.
- Salary tax and commission tax are separate doctor configuration streams with effective dates.
