

CH SHARIF AND SAEED HOSPITAL

High-Cost Medicine Authorization v7.2

Configurable inpatient medicine cost-control policy for Self-Pay and Panel patients.

FINAL SOURCE OF TRUTH - VERSION 7.2

Admission begins at Front Desk. Department bills remain separate. Central collections are allocated department-wise. Doctor discharge re-authentication, outsourced department settlement, Panel receivables, high-cost medicine approval, doctor-sponsored discount and doctor tax rules are included.

Supersedes v7.1 for all revised admission, billing, department settlement, doctor finance and panel-flow rules.

1. Configurable Policy

Setting	Options
Enabled	Yes / No
Threshold	Management-configured PKR amount; no hard-coded hospital value
Threshold basis	Line Total recommended; optional Per Unit if hospital configures it
Attendant confirmation	Required / Not Required
Management authorization	Admin/Super Admin required / Not Required
Combined rule	Attendant only, Management only, Either One, Both Required
Panel addition	Optional panel preauthorization/reference requirement

2. Trigger Formula

Medicine Line Amount = Quantity x Current Approved Rate. If policy basis is Line Total and Line Amount exceeds configured threshold, request becomes Authorization Required.

Authorization workflow

1	Admission creates Hospital Managed medicine request.
2	System evaluates threshold.
3	If below threshold, normal Pharmacy request flow continues.
4	If above threshold, request is blocked and popup opens.
5	Capture attendant confirmation details when required.
6	Capture Admin/Super Admin credential authorization when required.
7	If all required approvals pass, request becomes Authorized and can be sent to Pharmacy.
8	Rejected/Pending request cannot be dispensed.

3. Popup Fields

Area	Fields
Medicine	Medicine, quantity, unit rate, line total, threshold
Attendant	Name, relationship, contact/CNIC if configured, confirmation checkbox, confirmed-by hospital user, date/time
Management	Authorizing username/password, role validation, reason/note, approved date/time
Panel	Optional panel authorization/reference when required by contract

4. Security Rule

Admission staff cannot type an approver name and continue. Where management authorization is required, actual Admin/Super Admin credentials must be validated and the authenticated user ID/name/role stored.
