

CH SHARIF AND SAEED HOSPITAL

Formulas & Calculation Rules v7.2

Core calculation rules for department billing, patient allocation, panel receivables, provider settlement, doctor commission and taxes.

FINAL SOURCE OF TRUTH - VERSION 7.2

Admission begins at Front Desk. Department bills remain separate. Central collections are allocated department-wise. Doctor discharge re-authentication, outsourced department settlement, Panel receivables, high-cost medicine approval, doctor-sponsored discount and doctor tax rules are included.

Supersedes v7.1 for all revised admission, billing, department settlement, doctor finance and panel-flow rules.

1. Department Billing

Department Net Invoice = Department Gross Charges - Owner-Specific Discounts / Contract Adjustments + Approved Adjustments

Patient Consolidated Total = Sum of Department Net Invoices

2. Payment Allocation

Sum of Department Allocations = Posted Patient Payment Amount

A payment cannot be posted as fully allocated while allocation total differs from the receipt amount, except where an explicit unallocated patient credit balance is intentionally permitted by policy.

3. Admission Advance

Available Patient Credit = Advances + Unallocated Overpayments - Allocations Applied to Department Invoices

4. Department Outstanding

Department Outstanding = Department Net Invoice - Patient Allocations - Panel Realizations Applied - Other Approved Credits

5. Panel Billing

Panel Contract Amount = Tariff / Contract Calculation for Eligible Service

Patient Share + Panel Receivable = Contract Amount (subject to approved contract adjustments)

6. Outsourced Provider Settlement

Realized Department Amount = Patient Collections Allocated + Panel Remittances Realized for that Department

Provider Settlement Outstanding = Eligible Provider Payable from Realized Amount - Provider Settlements Already Posted

7. High-Cost Medicine

Medicine Line Amount = Quantity x Approved Unit Rate

Authorization Required when configured threshold rule evaluates true.

8. Doctor Commission and Doctor Discount

Calculated Commission = Fixed Amount OR Commission Base x Commission %

Commission Before Tax = max(0, Calculated Commission - Doctor-Sponsored Discount +/- Approved Commission Adjustments)

If the contract uses NET_AFTER_DISCOUNT as commission base, hospital-funded/contract pricing may also affect the calculated commission base. Doctor-Sponsored Discount is still tracked explicitly and charged against the doctor commission.

9. Doctor Commission Tax

Commission Tax = Taxable Commission Base x Configured Commission Tax Rate OR configured method/value

Net Commission Payable = Commission Before Tax - Commission Tax - Other Approved Commission Deductions + Approved Adjustments

10. Salary and Salary Tax

Salary Payable Before Tax = Period Base Salary + Allowances - Attendance Deductions - Other Approved Deductions +/- Adjustments

Net Salary Payable = Salary Payable Before Tax - Salary Tax (using effective salary-tax configuration)

11. Independence Rule

Salary Payable and Commission Payable remain separate ledgers, approvals, payments and outstanding balances.
