

CH SHARIF AND SAEED HOSPITAL

Client Functional Walkthrough v7.2

Plain-language explanation of the revised patient, department, panel, doctor and settlement workflows.

FINAL SOURCE OF TRUTH - VERSION 7.2

Admission begins at Front Desk. Department bills remain separate. Central collections are allocated department-wise. Doctor discharge re-authentication, outsourced department settlement, Panel receivables, high-cost medicine approval, doctor-sponsored discount and doctor tax rules are included.

Supersedes v7.1 for all revised admission, billing, department settlement, doctor finance and panel-flow rules.

What Changed in v7.2

- Admission is created at Front Desk / Billing, not inside the Admission Portal.
- Front Desk may collect admission advance and any later partial/final Hospital collections.
- Admission Portal receives the admission file and manages bed, stay, procedures, department requests, running charges and discharge workflow.
- Each bill-owning department has a separate sub-invoice. Front Desk remains the central patient collection point.
- Collected money is allocated to the related department invoice; settlement to outsourced departments happens later through an authorized settlement workflow.
- Hospital-funded discount affects Hospital Services only. Doctor-sponsored discount is explicitly charged against that doctor's commission.
- Only a doctor with valid clinical authorization credentials may clinically discharge an admitted patient.
- High-cost medicine requests are blocked until the configured authorization policy is satisfied.
- Panel patients keep patient-share and panel-receivable amounts separate at department-invoice level.
- Salary tax and commission tax are separate doctor configuration streams with effective dates.

Simple Patient Story

Client walkthrough

1	Patient arrives at Front Desk.
2	Front Desk creates admission and may collect advance.
3	Admission team manages stay and adds Hospital/Lab/Pharmacy/Neurology/other services.
4	Bills remain separate by department while patient sees a combined running statement.
5	Patient may pay partially during stay; Front Desk allocates money to department invoices.
6	Doctor clinically discharges after entering doctor credentials and summary.
7	Front Desk completes final bill and patient payment.
8	Hospital later settles outsourced departments/providers from realized collections.

Panel Patient Story

Panel patient is verified against Panel Patient Registry and panel contract. Every department bill separates patient co-pay from panel receivable. Front Desk collects patient share; panel money remains receivable until remitted. Outsourced department settlement uses only money actually realized.

Doctor Discount and Tax

A doctor may sponsor a discount for their own patient. That amount is tracked as Doctor-Sponsored Discount and is deducted from the doctor commission, not from Lab/Pharmacy ownership. Salary tax and commission tax are configured separately and applied to their respective payment streams.

High-Cost Medicine

Hospital management can set a medicine-value threshold and decide whether attendant confirmation, Admin/Super Admin authorization, either one or both are required. A request above the threshold cannot be dispensed until the configured rule is satisfied.
